

Achievements

- ✓ enComply, one of our fast growing product ,helping the businesses in compliance and filing their GST returns has achieved some major successes
 - » succeeded in improving it's operations efficiency and drastically reduced the go live time from 10 days to 3 days. Gave 100% customer satisfaction to Quick Heal and Endurance clients by making their Compliance and GST Returns go-live in 3 days.
 - » Successfully launched audit proof GSTR 3B and helped businesses by reducing their expenditure on auditing by identifying the discrepancies between GSTR 1 and GSTR 3B before filing GSTR-3B.
 - » Achieved a major milestone of doing PAN INDIA GST Returns reconciliation and reduced the amount of time spent by businesses by 30% on reconciliation by making the process more simple.
- ✓ Bridgestone one of the world's largest tyre and rubber products manufacturer has acknowledged our expertise in Hybris implementations and gave us an opportunity to be a part of their digital transformation and ecommerce initiative. This resulted in Adaequare providing offshore resources to Bridgestone via method 360, a SAP Partner for their migration of e-commerce site from third party service to SAP Hybris. This opens up for Adaequare to explore more opportunities in providing offshore services to businesses in other areas as well.

New Clients

Riddles

1. What is the tree that we all carry in our hand?
2. What moves without seeing and cries without eyes?
3. What can you hold in your left hand but can never hold in your right hand?
4. You can drop me from the tallest building and I'll be fine, but if you drop me in water I die. What am I?
5. What has a head and a tail, but no body?

Answers : 1) Palm, 2) A cloud, 3) Your right Hand, 4) Paper, 5) Coin

Birthdays of Employees

Sairaj Subhash Pokharkar	Azher Uddin Farooqi
Ashok Pawar	Vijaya Kumar Adepu
Asha Sarjapur	Sneha Donthi
Vipul Vijay Bhatkar	Ravali Reddy Gangula

News Letter

August, 2018

Are you tweaking your code to remove cross browser inconsistencies?

Here is a utility which can help you:

dojo toolkit

What is Dojo?

The Dojo toolkit which is also simply known as Dojo is an open-source modular toolkit containing a JavaScript that targets the needs of large-scale client-side Web development by automating some very important processes. One of these is the automation and simplification of browser compatibility as it abstracts their differences by providing APIs that already work for all of them. This toolkit also provides a framework for creating code modules and for defining and managing their dependencies, and also the necessary tools for building and optimizing CSS and JavaScript, doing unit testing and creating documentation. It also provides a rich suite of commonly used utility classes and UI-enhancing widgets.

Provides Better Quality:

Infrastructure for internationalization and accessibility is woven through the entire fabric of Dojo. Keystrokes are hinted correctly. The components all fit together as a cohesive whole. Everything is customizable easily with CSS, but very little needs to be tweaked to get a great looking UI nearly everywhere.

Provides Better Performance:

Dojo's package system makes it easy to manage large-scale UI development projects and the build system layers on top to make your applications scream; all without code changes. Dojo also packs high performance implementations of common utilities into its core, and the recent releases were heavily focussed on performance which resulted to reduced code footprint.

Why to use Dojo?

Provides Better User Experience:

Dojo is full stack. So instead of assembling various components from different sources together, it allows to build each component on a trusted set of high-quality building blocks by providing integrated infrastructure and a wide variety of optional modules. It is great infrastructure for providing better user experience.

Open Community:

Dojo is an open community. Over a period many individuals and companies have been able to come together on a level playing field to build tools that benefit everyone.

Do you want to visualize the data from different sources with minimum IT dependency? Then, you must know about

What is Power BI?

Power BI is a Microsoft product which will be mainly used by business analysts to get insights from the huge amount of data. It is a data visualization, report building and dashboard building tool.

Advantages of Power BI:

- ✓ Multiple heterogeneous data sources can be connected in a simply way to get data.
- ✓ Data visualizations can be shared across multiple people in the organization.
- ✓ Machine learning capabilities of Power BI will provide advances analytics and quick deep insights into the data.
- ✓ User can create their own custom reports and dashboard with simple drag and drop.
- ✓ Instead of running complex queries, user can write simple statement like "What are my sales in last month?" and get the insights in no time.
- ✓ Integration with Cortana (Voice assistant) will help user to get insights into data just by speaking.
- ✓ Mobile compatibility ensures that dashboards built using Power BI can be accessed in any device without any issues.
- ✓ Auto refresh can be set up and latest reports can be published and made accessible to the users quickly and on time.
- ✓ Ability to host the Power BI on cloud will avoid the memory issues on local machines and gives better performance.

Open Training Sessions

Learning and Development is a new initiative from the Human Resources Team, that aims to condition the culture of Knowledge sharing, Training, Coaching and mentoring of various Soft skills within the organization. In addition to the various technical trainings happening in the organization, the HR Team recognized

In the Phase 1

- ✓ Time Management
- ✓ Business Communication
- ✓ Performance under pressure
- ✓ Email etiquette
- ✓ Call etiquette

the importance of "Soft Skills" term used by employers to describe the personal attributes that enhance an individual's interactions, job performance and career prospects. Skills such as listening, teaming up with others, presenting ideas and communicating with team members are all highly valued in the modern workplace. Keeping this in mind, certain Soft Skill trainings were identified with the collaborative effort of the Managers and the HR team.

These modules are being conducted across the organization. Interested employees can reach out to their respective managers to be nominated for these trainings .
